

# Reduce IT Cost

Independent software vendor  
needed to reduce IT expense for  
legacy software

## Client Need

Get upgraded to Information Server 8.x from Ascential from 7.x or pay higher support fees.

## Client Benefits

- IBM stopped supporting version 7.x. Client would need to pay additional money to get extended support.
- Reduced overhead associated with maintaining the additional servers as the rest of the projects were migrated to version 8.x.
- Estimated savings of USD **\$320K** in 1 year.

## PR3 Systems Solution

Formulized best practices and methods. Upgraded to **InfoSphere Information Server 8.x** to reduce the risk to migration projects and to migrate the projects in a shorter period of time.
